Allow your high speed memory to operate at peak performance!

Made from the highest grade thermally conductive copper or Aluminum, these high-performance memory cooling kit makes your DDR, DDR2, or SDRAM memory continue to run smoothly even when overclocking your system! Keeps your memory cool and prevents damage due to heat failure. Its high conductivity thermal pad technology allows for optimal heat transfer from your memory to the copper heat shield. Its a breeze to install, simply peel the adhesive tape, align the memory stick, and snap on the clip.
